

E-Invoice Platform

Onboarding Session Checklist

Document Type: Internal Use — Session Facilitator

Duration: 60–90 minutes

Version: 1.0

Date: May 20, 2026

Pre-Session Preparation

24 hours before session:

- ☐ Client questionnaire received and reviewed
- ☐ Integration complexity assessed
- ☐ Sample invoices reviewed
- ☐ LHDN credentials validated (if provided early)
- ☐ Meeting link sent (Teams/Zoom)
- ☐ Calendar invite sent with agenda
- ☐ Screen-sharing and recording permissions confirmed

Required Materials:

- ☐ Client's completed questionnaire
- ☐ Integration assessment report (if custom work)
- ☐ API documentation link (if API integration)
- ☐ CSV template file (if manual upload)
- ☐ SOW document (if integration work required)
- ☐ Access to demo platform account

Required Attendees:

From Client:

- Primary contact (decision maker)
- Technical/IT staff (if available)
- Accounting/finance lead

From SteadyDevs:

- Onboarding facilitator (primary)
 - Technical support (for integration questions)
-

Session Structure

Opening (5 minutes)

- ☐ **Welcome & introductions**
 - Introduce SteadyDevs team
 - Client team introductions + roles
 - Confirm recording permission
 - ☐ **Agenda overview** (set expectations)
 - Account setup (15 min)
 - LHDN credentials (20 min)
 - Environment config (10 min)
 - Product master (15 min)
 - Integration (20 min)
 - Testing (15 min)
 - Q&A (10 min)
 - ☐ **Housekeeping**
 - Keep questions for end of each section
 - Screen sharing will be used throughout
 - Session will be recorded for internal reference
-

Phase 1: Account Setup (15 minutes)

1.1 Plan Tier Confirmation

- ☐ Confirm selected plan: ☐ Free ☐ Starter ☐ Business ☐ Growth ☐ Premium
- ☐ Review plan features:
 - Invoice quota: [X] invoices/month
 - User seats: [X] users
 - API keys: [X] keys
 - Webhooks: [X] endpoints
- ☐ Confirm billing cycle: ☐ Monthly ☐ Annual (17% discount)
- ☐ 30-day free trial explained (no credit card required)

1.2 Account Creation

Screen share: Platform registration page

- ☐ Navigate to registration URL
- ☐ **Primary admin user:**
 - ☐ Email address entered
 - ☐ Strong password created (show requirements)
 - ☐ Password confirmed
- ☐ **Email verification:**
 - ☐ Verification email sent
 - ☐ Client clicks verification link
 - ☐ Email confirmed ☒
- ☐ **First login successful**

1.3 Company Profile Completion

Screen share: Settings → Company Profile

- ☐ **Business information:**
 - ☐ Company legal name (copy from questionnaire)
 - ☐ Business Registration Number (BRN)
 - ☐ Taxpayer Identification Number (TIN)
 - Format validation: C1234567890 or IG1234567890
 - ☐ MSIC Code (validate against lookup table)
- ☐ **Registered address:**
 - ☐ Address line 1
 - ☐ City
 - ☐ State (dropdown)
 - ☐ Postcode (5-digit validation)
 - ☐ Country: Malaysia
- ☐ **Contact information:**
 - ☐ Primary contact name
 - ☐ Primary contact phone
 - ☐ Accounting contact (if different)
- ☐ **Profile saved** ☒

1.4 Multi-Entity Setup (Premium Only)

Skip this section if not Premium plan

- ☐ **For each additional entity:**
 - ☐ Create tenant
 - ☐ Enter TIN (must be unique)

- ☐ Enter company name
 - ☐ Separate LHDN credentials will be configured per entity
 - ☐ **Explain isolation:** Each entity has separate invoices, certificates, submission history
-

Phase 2: LHDN Credentials Setup (20 minutes)

 **CRITICAL SECTION – Go slowly, validate each step**

2.1 Navigate to LHDN Configuration

Screen share: Settings → LHDN Configuration

- ☐ **Sandbox mode toggle visible**
 - ☐ **Start in Sandbox mode** (recommended)
 - ☐ Explain: Sandbox = test mode, no real LHDN submissions
 - ☐ Production = live submissions (only after testing)

2.2 Enter MyInvois Credentials

- ☐ **Client ID:**
 - ☐ Copy-paste from client's documentation (avoid typos)
 - ☐ Trim whitespace
 - ☐ Example format: `c1234567890_1234567890abcdef`
- ☐ **Client Secret:**
 - ☐ Copy-paste carefully
 - ☐ Field masks secret after entry (shows
 - ☐ **Important:** Cannot be retrieved after save
- ☐ **Taxpayer TIN:**
 - ☐ Must match company TIN from profile
 - ☐ Validate format automatically
 - ☐  If mismatch → Error shown, must correct

2.3 Upload Digital Certificate

- ☐ **Certificate file upload:**
 - ☐ Click "Upload Certificate" button
 - ☐ Select file (.pem or .pfx)
 - ☐ **Validation checks:**
 - ☐ File format valid 
 - ☐ Certificate not expired 

- ☐ Certificate TIN matches company TIN 
- ☐ Certificate valid for > 60 days 
- ☐ **Certificate password (if .pfx):**
 - ☐ Enter password
 - ☐ Confirm password
- ☐ **Certificate uploaded** 

2.4 Test LHDN Connection

This is the moment of truth

- ☐ Click **"Test Connection"** button
- ☐ **Watch for:**
 - ☐ "Connecting to LHDN..." spinner
 - ☐ OAuth2 token request sent
 - ☐ Token received 
 - ☐ Certificate signature test passed 
 - ☐ **Green checkmark: "Connection successful"** 

If test FAILS:

Common error 1: Invalid Client ID/Secret

- ☐ Re-enter credentials carefully
- ☐ Check for extra spaces, wrong characters
- ☐ Verify credentials with LHDN portal
- ☐ Retry test

Common error 2: Certificate TIN mismatch

- ☐ Certificate TIN: [Show value from cert]
- ☐ Company TIN: [Show value from profile]
- ☐  Client must obtain correct certificate
- ☐ **Cannot proceed until resolved**

Common error 3: Certificate expired

- ☐ Check certificate expiry date
- ☐ Client must renew certificate with CA
- ☐ **Cannot proceed until resolved**

Common error 4: LHDN API unreachable

- ☐ Check client's internet connection
- ☐ Check firewall settings

- ☐ Retry in 2-3 minutes
- ☐ If persistent → LHDN service may be down (rare)

⚠ DO NOT PROCEED UNTIL TEST PASSES

- ☐ **Final check: Readiness Level 2 = COMPLETE** 
-

Phase 3: Environment Configuration (10 minutes)

3.1 Sandbox vs Production

- ☐ **Confirm current mode: Sandbox** 
- ☐ **Explain testing period:**
 - Recommend 1-2 weeks in sandbox
 - Submit 50-100 test invoices
 - Validate all workflows
 - Switch to production only after confidence
- ☐ **Production switch process:**
 - Simple toggle (requires confirmation)
 - All future submissions go to real LHDN
 - Invoice counter resets
 - No data migration needed (test data stays separate)

3.2 Email Alerts Configuration

Screen share: Settings → Notifications

- ☐ **Email service type:**
 - ☐ ☐ Client's SMTP server
 - ☐ ☐ SteadyDevs-managed SendGrid

If client SMTP:

- ☐ **SMTP settings entered:**
 - ☐ Host: [Client's SMTP host]
 - ☐ Port: [Usually 587 or 465]
 - ☐ Username: [SMTP username]
 - ☐ Password: [Will be encrypted]
 - ☐ Sender email: [Company email]
- ☐ **Test email sent:**
 - ☐ Click "Send Test Email"

- ☐ Client checks inbox
- ☐ Test email received ☒

If SteadyDevs-managed:

- ☐ Provisioned SendGrid account
- ☐ Sender domain configured
- ☐ Test email sent ☒
- ☐ **Notification preferences:**
 - ☐ ☒ Certificate expiry warnings (60d, 30d, 7d, 1d)
 - ☐ ☒ Quota warnings (80%, 95%, 100%)
 - ☐ ☒ LHDN rejection alerts
 - ☐ ☒ Daily submission summary (optional)

3.3 Quota & Billing

Screen share: Settings → Billing

- ☐ **Current plan displayed:**
 - Plan: [Name]
 - Invoice quota: [X]/month
 - Overage rate: RM [X.XX]/invoice
- ☐ **Usage alerts configured:**
 - ☐ 80% warning enabled
 - ☐ 95% warning enabled
 - ☐ 100% warning enabled
- ☐ **Explain overage billing:**
 - Not blocked when limit reached
 - Extra invoices charged at overage rate
 - Billed at start of next month
 - Upgrade recommended if consistently over
- ☐ **Payment method (if not trial):**
 - ☐ Stripe checkout link provided
 - ☐ Credit card details entered
 - ☐ Billing email confirmed

Phase 4: Product Master Setup (15 minutes)

4.1 Explain Purpose

- ☐ **What is product master?**
 - Catalogue of your products/services
 - Pre-defines: Tax type, tax rate, classification codes
 - **Tier 3 validation:** Auto-enriches invoices
 - Reduces manual data entry per invoice
- ☐ **Show benefit:**
 - Without product master: Must enter tax info per invoice line
 - With product master: Item code → all fields auto-filled

4.2 Bulk Import Option

If client has product list in CSV/Excel:

- ☐ **Download CSV template:**
 - ☐ Click "Download Template"
 - ☐ Show required columns:
 - item_code (unique)
 - description
 - tax_type (E, Z, S, etc.)
 - tax_rate (0.00, 0.06, 0.10)
 - classification_code (MSIC or product code)
- ☐ **Client prepares file:**
 - ☐ Open template in Excel
 - ☐ Fill in products (can do after session)
 - ☐ Save as CSV
- ☐ **Action item:** Client uploads within 3 days

4.3 Manual Entry Demonstration

Let's add 2-3 products together:

- ☐ **Click "Add Product"**
- ☐ **Product 1 example: Laptop computer**
 - ☐ Item code: LAP001

- ☐ Description: Dell Latitude Laptop
 - ☐ Tax type: S (Standard-rated)
 - ☐ Tax rate: 0.06 (6% SST)
 - ☐ Classification code: 47413 (Computers retail - MSIC)
 - ☐ Unit price: RM 2,500.00 (optional)
 - ☐ Save ☒
 - ☐ **Product 2 example: Consulting service**
 - ☐ Item code: SVC001
 - ☐ Description: IT Consulting - Hourly
 - ☐ Tax type: E (Exempt)
 - ☐ Tax rate: 0.00
 - ☐ Classification code: 62020 (IT consulting - MSIC)
 - ☐ Unit price: RM 400.00
 - ☐ Save ☒
 - ☐ **Product 3 example: Zero-rated export**
 - ☐ Item code: EXP001
 - ☐ Description: Exported goods
 - ☐ Tax type: Z (Zero-rated)
 - ☐ Tax rate: 0.00
 - ☐ Classification code: [Client's product code]
 - ☐ Save ☒
 - ☐ **Action item:** Client completes full product catalogue within 1 week
-

Phase 5: Integration Setup (20 minutes)

This section varies based on integration complexity

Option A: Manual CSV Upload (No Integration Work)

Best for: < 50 invoices/month, no technical resources

- ☐ **Navigate to: Invoices → Import**
- ☐ **Download CSV template:**
 - ☐ Click "Download CSV Template"
 - ☐ Open in Excel

- ☐ **Review required fields:**
 - ☐ invoice_number (must be unique)
 - ☐ invoice_date (YYYY-MM-DD format)
 - ☐ buyer_tin (required for > RM 10,000)
 - ☐ buyer_name
 - ☐ buyer_address
 - ☐ items[].item_code (matches product master)
 - ☐ items[].quantity
 - ☐ items[].unit_price
 - ☐ currency (MYR)
- ☐ **Demo upload with sample data:**
 - ☐ Populate 1-2 rows with client's sample invoice
 - ☐ Save as CSV
 - ☐ Click "Upload CSV"
 - ☐ Select file
 - ☐ Watch validation progress
 - ☐ **Success:** Invoice appears in dashboard
- ☐ **Client practices:**
 - ☐ Client uploads 1 invoice themselves
 - ☐ Guide through any errors
 - ☐ Confirm understanding

Option B: API Integration (Client Implements)

Best for: Client has dev team, modern system with API capability

- ☐ **Navigate to: Settings → API Keys**
- ☐ **Generate API key:**
 - ☐ Click "Generate New API Key"
 - ☐ Name: `[Client System] Integration`
 - ☐ Permissions: ☒ Submit invoices ☒ Query status
 - ☐ Click "Generate"
 - ☐ **Key generated:** `ei_1234567890abcdef...`
 - ☐ **Copy key** (show once only, cannot retrieve)
- ☐ **Provide API documentation:**
 - ☐ Send link: `https://docs.steadydevs.com/einvoice-api`
 - ☐ Show key endpoint: `POST /api/v1/adapters/import`
 - ☐ Authentication: `X-API-Key: ei_...` header
 - ☐ Show example cURL request
 - ☐ Show example JSON payload
- ☐ **Review code sample (if client dev present):**

```
// C# example
var client = new HttpClient();
client.DefaultRequestHeaders.Add("X-API-Key", "ei_YOUR_KEY");

var payload = new {
    invoice_number = "INV-2024-001",
    invoice_date = "2024-05-20",
    buyer_tin = "C1234567890",
    // ... other fields
};

var response = await client.PostAsJsonAsync(
    "https://api.steadydevs.com/einvoice/v1/adapter/import",
    payload
);
```

- ☐ **Webhook setup (if Business+ plan):**
 - ☐ Navigate to: Settings → Webhooks
 - ☐ Click "Add Webhook Endpoint"
 - ☐ Endpoint URL: <https://client-system.com/einvoice/webhook>
 - ☐ Events: ☒ invoice.approved ☒ invoice.rejected
 - ☐ Secret key generated (for HMAC signature validation)
 - ☐ Test webhook: Click "Send Test Event"
 - ☐ Client confirms receipt
- ☐ **Action item:**
 - ☐ Client's dev team implements integration
 - ☐ Target completion: [Date, 1-2 weeks]
 - ☐ First test submission within 3 days
 - ☐ SteadyDevs available for technical support

Option C: Custom Integration (SteadyDevs Implements)

Best for: Client needs custom work, billable project

- ☐ **Confirm integration assessment reviewed**
- ☐ **Review SOW:**
 - ☐ Integration approach: [Database / File watcher / etc.]
 - ☐ Deliverables: [List]
 - ☐ Timeline: [X weeks]
 - ☐ Investment: RM [Amount]
- ☐ **Explain development process:**
 - Week 1: Requirements validation + access provisioning

- Week 2-X: Development + testing
- Week X+1: Deployment + handover
- ☐ **What client provides:**
 - ☐ Database credentials / API keys (within 3 days)
 - ☐ Test environment access
 - ☐ Technical contact for questions
 - ☐ Sample data validation
- ☐ **Sign SOW:**
 - ☐ Client reviews and signs SOW
 - ☐ 50% deposit invoice sent
 - ☐ Kickoff meeting scheduled: [Date]
- ☐ **Action item:**
 - ☐ SOW signed and returned
 - ☐ Deposit paid within 5 business days
 - ☐ Integration kickoff: [Date]
 - ☐ Target go-live: [Date]

Option D: Pre-Built Adapter (If Available)

Best for: Common systems with existing adapters

- ☐ **Navigate to: Integrations → Adapter Registry**
- ☐ **Search for client's system:**
 - ☐ Search: [System name]
 - ☐ Adapter found: [Name] v[Version]
 - ☐ Author: [SteadyDevs / Community]
 - ☐ Status: ☒ Approved
 - ☐ Usage: [X] installs
- ☐ **Install adapter:**
 - ☐ Click "Install"
 - ☐ Adapter installed ☒
- ☐ **Configure adapter:**
 - ☐ Connection string: [Client's database or API URL]
 - ☐ Username: [If required]
 - ☐ Password: [If required]
 - ☐ Polling interval: [30 minutes / 1 hour / 4 hours]
 - ☐ Save configuration
- ☐ **Test adapter:**
 - ☐ Click "Test Connection"
 - ☐ Connection successful ☒
 - ☐ Click "Run Once" to trigger sample import

- ☐ Invoice(s) appear in dashboard 
 - ☐ **Enable adapter:**
 - ☐ Status: Enabled
 - ☐ Scheduled runs: Active
-

Phase 6: Testing & Validation (15 minutes)

Objective: Submit 1 complete test invoice end-to-end

6.1 Submit Test Invoice

Method depends on integration approach from Phase 5:

If manual CSV:

- ☐ Client uploads 1 test invoice via CSV

If API:

- ☐ Demo API call with cURL or Postman
- ☐ Show request payload
- ☐ Show response: 201 Created, invoice_id returned

If adapter:

- ☐ Trigger adapter manually: "Run Once"
- ☐ Adapter pulls invoice from source system

6.2 Watch Submission Flow

Screen share: Dashboard → Invoices

- ☐ **Invoice appears in list:**
 - ☐ Status: **PENDING** (if Tier 2 soft-reject)
 - ☐ OR Status: **SUBMITTED** (if all tiers passed)
 - ☐ Submission time shown
- ☐ **Click invoice to view detail:**
 - ☐ All fields displayed
 - ☐ Validation status for each tier:
 - Tier 1:  Structural validation passed
 - Tier 2:  LHDN completeness passed (or  issues listed)
 - Tier 3:  Auto-enrichment applied (or  not needed)

- ☐ **Background job processing:**
 - ☐ Navigate to: Jobs (admin view)
 - ☐ Show job queue: "Submit invoice [ID] to LHDN"
 - ☐ Job status: Running → Completed
- ☐ **LHDN API call (sandbox mode):**
 - ☐ Submission log shows API request
 - ☐ LHDN response: 200 OK
 - ☐ UUID assigned: [LHDN UUID]
 - ☐ QR code generated
 - ☐ Status updated: APPROVED (sandbox auto-approves)
- ☐ **Webhook fired (if configured):**
 - ☐ Webhook delivery log shows
 - ☐ Event: invoice.approved
 - ☐ Payload delivered to client's endpoint
 - ☐ Response: 200 OK

6.3 Review Invoice Detail Page

- ☐ **Navigate back to invoice detail**
- ☐ **Show key fields:**
 - ☐ LHDN UUID: [UUID]
 - ☐ QR code: [Display]
 - ☐ Status: APPROVED
 - ☐ Submission timestamp
 - ☐ Approval timestamp
- ☐ **Status history:**
 - ☐ Draft → Submitted → Approved
 - ☐ Each transition logged with timestamp
- ☐ **Download options:**
 - ☐ Download PDF (with QR code)
 - ☐ Download JSON (LHDN format)

6.4 Explain Status Polling

- ☐ **Background job runs every 5 minutes:**
 - Polls LHDN for status updates
 - Updates invoice status automatically
 - Fires webhook on change
- ☐ **In production:**
 - SUBMITTED invoices may stay pending for hours/days
 - LHDN reviews and approves/rejects

- Status sync keeps dashboard current

6.5 Demo Rejection Handling

Use intentionally bad test data:

- ☐ **Submit invoice with error:**
 - Example: Missing buyer TIN for RM 11,000 invoice
 - OR: Invalid date format
 - OR: Negative quantity
 - ☐ **Show Tier 1 hard reject (400):**
 - Invoice not saved
 - Error message shown immediately
 - Fix required before resubmission
 - ☐ **Show Tier 2 soft reject (422):**
 - Invoice saved to "Pending" status
 - Issues listed with plain-English explanation
 - Navigate to: Dashboard → Incomplete Invoices
 - Show action card: "Fix 1 invoice with missing buyer TIN"
 - Click "Fix Now" → Edit form opens
 - Add buyer TIN → Save → Status: Ready to submit
 - ☐ **Show Tier 3 auto-enrichment:**
 - Submit invoice with item_code only
 - Tax type, tax rate auto-filled from product master
 - Show "before" and "after" in audit log
-

Phase 7: User Management (5 minutes)

For Business, Growth, Premium plans only (skip if Free/Starter)

7.1 Explain Roles

Screen share: Settings → Users

- ☐ **Available roles:**
 - **TENANT_ADMIN:** Full access, can invite users, change settings
 - **TENANT_USER:** Submit invoices, view dashboard, edit products
 - **TENANT_VIEWER:** Read-only access, view invoices and reports only
- ☐ **Current user (client):** TENANT_ADMIN by default

7.2 Invite Team Members

- ☐ **Click "Invite User"**
 - ☐ **For each team member:**
 - ☐ Email address: [Team member email]
 - ☐ Role: [Select appropriate role]
 - ☐ Send invite ☒
 - ☐ Invite email sent (48-hour expiry)
 - ☐ **Explain invite process:**
 - Team member receives email with invite link
 - Clicks link → Sets password → Account created
 - User appears in user list with "Pending" status until accepted
 - ☐ **Action item:** Client invites accounting/finance team within 1 week
-

Phase 8: Go-Live Planning (5 minutes)

8.1 Review Onboarding Checklist

- ☐ ☒ Account created
- ☐ ☒ Company profile completed
- ☐ ☒ LHDN credentials tested and working
- ☐ ☒ Email alerts configured
- ☐ ☒ Product master populated (or in progress)
- ☐ ☒ Integration method decided and set up
- ☐ ☒ Test invoice submitted successfully
- ☐ ☒ Team members invited

8.2 Set Go-Live Timeline

- ☐ **Sandbox testing period:**
 - Duration: 1-2 weeks recommended
 - Target: Submit 50-100 test invoices
 - Validate all workflows (create, approve, reject, cancel)
 - Train team on dashboard
- ☐ **Switch to production:**
 - Target date: [Date, 2-4 weeks from today]
 - Requirements before switch:
 - ☐ Product master 100% complete
 - ☐ All team members onboarded

- ☐ Integration stable (< 5% error rate)
- ☐ Client confident with dashboard
- ☐ **First real submission:**
 - Target date: [Same day as production switch]
 - Process: Flip sandbox toggle → Submit 1 invoice → Verify LHDN approval
 - SteadyDevs support available during first submission

8.3 Confirm Support Channel

- ☐ **Primary support:**
 - Email: support@steadydevs.com
 - Response SLA:
 - Free: 5 business days
 - Starter: 5 business days
 - Business: 2 business days
 - Growth: 1 business day
 - Premium: 4 hours (critical issues)
 - ☐ **Emergency contact (Premium only):**
 - Phone: [Premium support number]
 - WhatsApp: [Premium support WhatsApp]
 - Use for: Production outages, urgent deadline issues
 - ☐ **Documentation portal:**
 - URL: <https://docs.steadydevs.com/einvoice>
 - Includes: User guides, API reference, troubleshooting, FAQs
-

Phase 9: Q&A & Wrap-Up (10 minutes)

9.1 Answer Client Questions

- ☐ **Common questions:**
 - "What if LHDN rejects an invoice?"
 - Rejection appears in dashboard with fix instructions, one-click resubmit
 - "Can we change plan tier later?"
 - Yes, upgrade/downgrade anytime, prorated billing
 - "What happens if we exceed invoice limit?"
 - Overage charges apply (RM 0.30–0.80 per invoice), not blocked
 - "How do we cancel?"
 - Cancel via dashboard, no penalty, data retained for [X] months

- "Is our data backed up?"
 - Yes, daily backups, 99.9% uptime target (Premium SLA)

9.2 Provide Resources

- ☐ **Email sent to client immediately after session:**
 - ☐ Dashboard URL: <https://einvoice-platform.onrender.com>
 - ☐ Login credentials: [Client's email]
 - ☐ API key (if generated)
 - ☐ Documentation links
 - ☐ Support email
 - ☐ Action items with deadlines
- ☐ **Resources attached:**
 - ☐ CSV template (if manual upload)
 - ☐ API documentation PDF (if API integration)
 - ☐ LHDN error code reference guide
 - ☐ Product master sample file
 - ☐ SOW (if integration work)

9.3 Schedule Follow-Ups

- ☐ **If integration work required:**
 - ☐ Integration kickoff call: [Date, 3-5 days from today]
 - ☐ Integration completion review: [Date, 2-3 weeks]
- ☐ **Go-live readiness review:**
 - ☐ Scheduled for: [Date, 1-2 weeks before production switch]
 - ☐ Agenda: Review test results, answer final questions, confirm go-live date
- ☐ **30-day check-in:**
 - ☐ Scheduled for: [Date, 30 days after go-live]
 - ☐ Agenda: Review usage, collect feedback, address any issues

9.4 Send Summary Email

- ☐ **Subject:** Onboarding Complete - [Client Name] E-Invoice Platform
- ☐ **Body includes:**
 - Summary of what was configured
 - Access credentials
 - Action items with owners and deadlines
 - Next meeting dates
 - Support contact
 - Documentation links

Post-Session Tasks

Within 2 hours of session:

- ☐ Update CRM: Onboarding status = Complete
- ☐ Send onboarding summary email
- ☐ Add client to "Post-Onboarding" support queue
- ☐ Set reminder for go-live readiness review
- ☐ If integration work: Create project in tracker, assign developer

Within 24 hours:

- ☐ Review session recording (if recorded)
- ☐ Note any unique requirements for future reference
- ☐ Update onboarding checklist if improvements needed

Ongoing:

- ☐ Monitor client's first 10 invoice submissions
- ☐ Proactively reach out if errors detected
- ☐ Respond to support requests per SLA

Success Metrics

Track after each onboarding:

Metric	Target	Actual
Session completed on time (< 90 min)	Yes	
LHDN credentials test passed	100%	
Test invoice submitted successfully	100%	
Client satisfied (verbal confirmation)	Yes	
No post-session issues within 48 hours	Yes	

Common Issues During Session

Issue: Client's LHDN credentials don't work

Solution:

- Recheck Client ID/Secret for typos
- Verify credentials in LHDN portal
- If persistent → Schedule follow-up after client contacts LHDN
- Do NOT proceed without working credentials

Issue: Certificate TIN mismatch**Solution:**

- Client must obtain correct certificate (cannot proceed)
- Offer to validate certificate before client pays CA
- Reschedule onboarding for 1-2 weeks later

Issue: Client has no product master data**Solution:**

- Manual entry during session is too time-consuming
- Provide CSV template
- Action item: Complete within 1 week
- Follow up with reminder email

Issue: Integration assessment missed complexity**Solution:**

- Be transparent: "Based on what I'm seeing now, this is more complex than initially assessed"
- Provide revised quote immediately
- Client approves or we fall back to manual CSV upload

Issue: Client expects features not in their plan**Solution:**

- Clearly explain plan limitations
- Offer upgrade if needed
- Document feature request for future development
